

BAGAS SARAS BUDI PRASTIKA

Front-End Developer

Jakarta, Indonesia | bagassarasbp@gmail.com | [GitHub](#) | [Portfolio](#) | [Linkedin](#) | (+62) 851-5658-2157

PROFESSIONAL SUMMARY

Front-End Developer with internship experience at Telkom Indonesia (Pijar), building and maintaining production React.js applications across multiple repositories. Skilled in component-based architecture, REST API integration, state management with Redux and Zustand, and unit testing with Jest. Experienced in Scrum workflows and collaborative development using GitLab.

CORE SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, Tailwind CSS, HTML, CSS

Backend: Laravel, PHP, MySQL, REST API

Tools: Git, GitHub, GitLab, Jest, Vite, Postman, Figma, Scrum, Taiga

PROFESSIONAL EXPERIENCE

Front-End Developer Intern | Telkom Indonesia (Pijar Indonesia), **Jakarta, Indonesia**

Nov 2025 – May 2026

- Recognized as Best Mentee in Program Pemagangan Nasional Kemnaker RI Batch 2 for outstanding performance and contribution during the internship program.
- Built and maintained UI features across 4 repositories including detail views, edit forms, and dashboard redesigns following modular component architecture and existing code conventions.
- Integrated REST API endpoints for new and updated views, ensuring consistent data flow between frontend components and backend services.
- Wrote unit tests using Jest to validate UI components and reduce regression during iterative development.
- Updated wording and terminology across teacher and admin portals to align with general platform standards.
- Managed application state using Redux and Zustand for scalable frontend state handling.
- Collaborated with developers and product teams in a Scrum workflow using GitLab and Taiga.

Front-End Developer Intern | PT. Razen Teknologi Indonesia, **Yogyakarta, Indonesia**

Oct 2024 – Dec 2024

- Developed frontend interfaces for internal web-based projects using Laravel, Blade, JavaScript, and Tailwind CSS.
- Collaborated with backend and UI/UX team members within a shared repository workflow during project development.
- Integrated frontend views with backend functionality and implemented responsive layouts based on provided UI designs.

Cybersecurity Teaching Assistant | Universitas Muhammadiyah Yogyakarta

Feb 2024 – Jul 2024

- Guided 70+ students through hands-on cybersecurity lab sessions, explaining technical concepts and troubleshooting issues in real time.
- Supported course administration including grading and attendance tracking alongside the lecturer.

EDUCATION

Bachelor of Computer Science

Universitas Muhammadiyah Yogyakarta (UMY)

2021-2025

GPA: 3.59 / 4.00

CERTIFICATION

Web Developer (BNSP) Badan Nasional Sertifikasi Profesi (BNSP)	2025
Microsoft Office Specialist (MOS): Excel 2019 Associate Microsoft	2025

PROJECTS

Final Project Tahfidz Class Memorization Assessment System

Role: Full-Stack Developer (Individual Project) | Technology: Laravel, MySQL, Blade, Tailwind CSS, JavaScript

- Designed and developed a role-based memorization assessment system for a partner junior high school to replace manual paper-based evaluation workflows.
- Modeled relational database and implemented end-to-end features including submission workflow, scoring, and reporting.
- Reduced manual evaluation time for teachers through digitized assessment and centralized data management.
- The project was adopted for a lecturer-led funded research initiative and prepared for implementation at a partner junior high school.

Personal Website Portfolio

Role: Full-Stack / Front-End Developer | Technology: Next.js, TypeScript, Tailwind CSS, Vercel

- Built and deployed a responsive portfolio website using Next.js and TypeScript to showcase projects and technical skills.
- Implemented reusable UI components and responsive layouts using Tailwind CSS.
- Managed deployment and version control workflow using Vercel, Git, and GitHub.

Pre-Order Management Web Application (In Development)

Role: Full-Stack Developer | Next.js, TypeScript, Node.js, PostgreSQL, Tailwind CSS

- Building a full-stack pre-order management platform using Next.js, TypeScript, Node.js, and PostgreSQL, with payment integration via Midtrans.
- Implementing queue management, order tracking, and centralized admin features to replace manual Google Forms-based workflows.
