Jakarta, Indonesia

Front-End focused Web Developer with hands-on experience in maintaining and enhancing production-grade web applications and developing academic information systems. Strong in building scalable UI using the modern JavaScript ecosystem (React.js, Next.js, Tailwind) with a solid Laravel back-end foundation.

Education

Universitas Muhammadiyah Yogyakarta - Yogyakarta, Indonesia

Sep 2021 - Jul 2025

Bachelor of Computer Science, 3.59/4.00

Experience

Telkom Indonesia - Kebayoran Baru, Indonesia

Nov 2025 - Present

Front-End Developer Intern

- Contributing on maintenance of existing web applications driven by version updates and bug fixing, using modular programming and component-based architecture.
- Implementing new features and UI enhancements with JavaScript and CSS based on product requirements, translating designs into responsive interfaces.
- Working in a Scrum environment using Taiga for task management and GitLab for version control and collaborative development.

PT Razen Teknologi Indonesia - Yogyakarta, Indonesia

Oct 2024 - Dec 2024

Front-End Developer Intern

- Developed and implemented new user-facing features and components for web applications, ensuring high performance and responsive design.
- Collaborated closely with UI/UX designers and back-end developers to translate visual mockups and business requirements into clean, functional code.
- Maintained and debugged the existing codebase, resolving technical issues and contributing to system stability.

Universitas Muhammadiyah Yogyakarta - Yogyakarta, Indonesia

Feb 2024 - Jul 2024

Teaching Assistant, Cybersecurity Course

- Supported a lecturer in facilitating two classes, providing direct assistance to approximately 70 students during practical sessions.
- Managed class administration, including attendance, and contributed to grading and assessment to ensure a fair evaluation process.
- Fostered a collaborative learning environment, serving as a key resource for students throughout the course.

Project

Final Project - Universitas Muhammadiyah Yogyakarta

Mar 2025 - Jul 2025

Tahfidz Class Memorization Assessment System

Role: Full-Stack Developer (Individual Project) | Technology: Laravel, MySQL, Blade, Tailwind CSS, JavaScript

- Designed and developed a role-based memorization assessment system used by a partner junior high school to replace manual paper-based evaluation.
- Modeled relational database and implemented end-to-end features including submission workflow, scoring, and reporting.
- Reduced manual evaluation time for teachers through digitized assessment and centralized data management.

Personal Website

Portfolio

Role: Web Developer (Full-Stack/Front-End) | Technology: Next.js, TypeScript, JavaScript, CSS, Vercel

- Developed a personal portfolio website from scratch to showcase skills and projects. Built with Next.js and implemented using TypeScript to ensure code scalability and maintain type safety.
- Fully responsible for a responsive and modern Front-End design, utilizing CSS/Tailwind CSS to create an engaging and interactive user interface. Maintained professional code management using Git/GitHub.
- Successfully managed the end-to-end deployment of the site using Vercel, demonstrating a strong understanding of the modern web application development life cycle.
